---	--	--

Vorderseite

4	place figure	SP
<p>who (role): active player what (aim): place figure to the next field why (use): advance in the game</p>		
3		(SP post)

Rückseite

<p>precondition: played a card action: figure is selected result: figure is placed on the next field depending on the color of the card, if there is a token on the field, the token-action will be executed</p>		
--	--	--

Vorderseite

2	found token: wishingstone	SP
<p>who (role): active player what (aim): points at game-end why (use): found wishingstone</p>		
1		(SP post)

Rückseite

<p>precondition: the field his figure moved to has a wishingstone on it action: gets one wishingstone result: at the end of the game, the wishingstone amount gets added to the points (-4, -3, 2, 3, 6, 10)</p>		
--	--	--

Vorderseite

2	found token: mirror	SP
<p>who (role): active player what (aim): points at game-end why (use): found mirror</p>		
1		(SP post)

Rückseite

<p>precondition: the field his figure moved to has a mirror on it action: gets one mirror result: at the end of the game, each mirror doubles the wishingstone points</p>		
---	--	--

Vorderseite

2	found token: points	SP
<p>who (role): active player what (aim): excecutes points-action why (use): field has points-token</p>		
1		(SP post)

Rückseite

<p>precondition: the field his figure moved to has a points-token on it action: gets points according to token result: has gotten points</p>		
--	--	--

Vorderseite

2	found token: cloverleaf	SP
<p>who (role): active player what (aim): excecutes cloverleaf-action why (use): field has cloverleaf-token</p>		
2		(SP post)

Rückseite

<p>precondition: field his figure moved to has cloverleaf-token action: move figure to next field with cloverleaf-token in color of cloverleaf result: figure has moved, if new field also has a token, token gets excecuted as well</p>		
--	--	--

Vorderseite

2	found token: spiral	SP
<p>who (role): active player what (aim): spiral-action why (use): field has spiral-token</p>		
2		(SP post)

Rückseite

<p>precondition: field player has moved figure to has spiral-token action: can move figure backwards (but not on field the figure started from) result: figure has moved, if new field has a token, token gets executed as well</p>		
---	--	--

Vorderseite

2	found token: goblin	SP
<p>who (role): active player what (aim): goblin-action why (use): goblin-token on field</p>		
2		(SP post)

Rückseite

precondition: field the figure has moved to has goblin-token
action: can discard a card (from hand or last card from colored pile)
result: card has been discarded

Vorderseite

1	make Goblin-Specialaction	SP
<p>who (role): active player what (aim): make Goblin-specialaction why (use): get extra points</p>		
1		(SP post)

Rückseite

precondition: has not yet made the action in the game
action: turn goblin-token on the other side
result: get points according to figures on goblin-fields
(3 on 3: 15 points, 3 on 2: 10 points, 3 on 1: 5 points)

Vorderseite

2	place oracle	SP
<p>who (role): active player what (aim): places oracle on field with his own figures on it why (use): get oracle points</p>		
2		(SP post)

Rückseite

<p>precondition: played a card action: chooses a number (depending on the oracle number) and moves oracle result: gets 5 points if player has a figure on the field</p>		
---	--	--

Vorderseite

3	load and save game	SP
<p>who (role): active player what (aim): save the game why (use): so it can be loaded and continued later</p>		
1		(SP post)

Rückseite

<p>precondition: has to save one so it can be loaded action: save or load the game result: game is saved or loaded</p>		
--	--	--
